

GoogleImportJob Data Object - Campaign Management

8/4/2021 • 4 minutes to read • [Edit Online](#)

Defines a Google import job that can be run once or scheduled on a recurring basis.

An account can have up to 100 scheduled Google import jobs.

TIP

For an implementation overview, see the [Google Ads Import](#) technical guide.

Syntax

```
<xs:complexType name="GoogleImportJob" xmlns:xs="http://www.w3.org/2001/XMLSchema">
  <xs:complexContent mixed="false">
    <xs:extension base="tns:ImportJob">
      <xs:sequence>
        <xs:element minOccurs="0" name="CampaignAdGroupIds" nillable="true"
type="tns:ArrayOfCampaignAdGroupIds" />
        <xs:element name="CredentialId" nillable="true" type="xs:string" />
        <xs:element name="GoogleAccountId" nillable="true" type="xs:long" />
        <xs:element minOccurs="0" name="GoogleUserName" nillable="true" type="xs:string" />
      </xs:sequence>
    </xs:extension>
  </xs:complexContent>
</xs:complexType>
```

Elements

The [GoogleImportJob](#) object has the following elements: [CampaignAdGroupIds](#), [CredentialId](#), [GoogleAccountId](#), [GoogleUserName](#).

ELEMENT	DESCRIPTION	DATA TYPE
---------	-------------	-----------

ELEMENT	DESCRIPTION	DATA TYPE
CampaignAdGroupIds	<p>The list of campaigns and their ad groups to import from Google Ads.</p> <p>The identifiers are saved but not validated when you create an import job. If you include invalid campaign or ad group IDs, or if they become invalid e.g., the entities are deleted later from Google Ads, the invalid entities will be skipped during import.</p> <p>Add: Optional. If this element is not set, then all of the campaigns and ad groups in the Google Ads account are eligible for import. The set of imported entities also depends on your import options.</p> <p>Update: Optional. If no value is set for the update, this setting is not changed.</p>	CampaignAdGroupIds array
CredentialId	<p>Authorizes a Google Ads user to import accounts to Microsoft Advertising.</p> <p>This element is not returned when you get the GoogleImportJob.</p> <p>See the Get an Import Credential ID guide for more details.</p> <p>Add: Required Update: Read-only</p>	string
GoogleAccountId	<p>The Google Ads account to import.</p> <p>Add: Required Update: Read-only</p>	long
GoogleUserName	<p>The Google account i.e., the Google user credentials with access to the Google Ads account.</p> <p>Add: Read-only Update: Read-only</p>	string

The [GoogleImportJob](#) object has [Inherited Elements](#).

Inherited Elements

Inherited Elements from ImportJob

The [GoogleImportJob](#) object derives from the [ImportJob](#) object, and inherits the following elements: [CreatedByUserId](#), [CreatedByUserName](#), [CreatedDateTimeInUTC](#), [Frequency](#), [Id](#), [ImportOption](#), [LastRunTimeInUTC](#), [Name](#), [NotificationEmail](#), [NotificationType](#), [Status](#), [Type](#). The descriptions below are specific to [GoogleImportJob](#), and might not apply to other objects that inherit the same elements from the [ImportJob](#) object.

ELEMENT	DESCRIPTION	DATA TYPE
CreatedByUserId	<p>The unique identifier of the Microsoft Advertising user who created the import job.</p> <p>Add: Read-only Update: Read-only</p>	long
CreatedByUserName	<p>The login user name of the Microsoft Advertising user who created the import job.</p> <p>Add: Read-only Update: Read-only</p>	string
CreatedDateTimeInUTC	<p>The date and time when the import job was created.</p> <p>The date and time is expressed in Coordinated Universal Time (UTC).</p> <p>Add: Read-only Update: Read-only</p>	dateTime
Frequency	<p>Determines whether the import job should be run once or scheduled on a recurring basis.</p> <p>To run the import job now, this element must be nil or empty.</p> <p>Add: Optional Update: Optional. If no value is set for the update, this setting is not changed.</p>	Frequency
Id	<p>The unique Microsoft Advertising identifier of the import job.</p> <p>Add: Read-only Update: Read-only</p>	long
ImportOption	<p>The Google import options that are available via API.</p> <p>To customize Google import options, you can include a GoogleImportOption object. Otherwise to use the default Google import options, you can leave this element nil or empty. For more information about default options, see GoogleImportOption.</p> <p>Add: Optional Update: Optional. If no value is set for the update, this setting is not changed.</p>	ImportOption

ELEMENT	DESCRIPTION	DATA TYPE
LastRunTimeInUTC	<p>The most recent import date and time for this job.</p> <p>The date and time is expressed in Coordinated Universal Time (UTC).</p> <p>Add: Read-only Update: Read-only</p>	dateTime
Name	<p>The name of the import job.</p> <p>The name can be between 1 to 255 characters in length.</p> <p>Add: Required Update: Read-only</p>	string
NotificationEmail	<p>The email address where import results should be sent.</p> <p>This element is not returned by default. To get this element, include the NotificationEmail value in the ReturnAdditionalFields element when you call the GetImportJobsByIds and GetImportResults service operations.</p> <p>Add: Optional Update: Optional. If no value is set for the update, this setting is not changed.</p>	string
NotificationType	<p>Determines whether and how often you want to receive email notifications about the import job results.</p> <p>The supported values are "None" (No emails), "Changes" (Only if there are changes or errors), "Errors" (Only if there are errors), and "EveryTime" (Every time this import runs).</p> <p>Add: Optional. If not set, the service sets this element to "None" by default. Update: Optional. If no value is set for the update, this setting is not changed.</p>	string
Status	<p>The status of the import job.</p> <p>The possible values are "Active" and "Deleted". Scheduled imports will have an "Active" status, whether the job is scheduled once or on a recurring basis in the future. The status of import jobs that only run once will be set to "Deleted" after the import.</p> <p>Add: Read-only Update: Read-only</p>	string

ELEMENT	DESCRIPTION	DATA TYPE
Type	<p>The type of the import job.</p> <p>This value is <i>GoogleImportJob</i> when you retrieve a Google import job.</p> <p>For more information about import job types, see the ImportJob Data Object Remarks.</p> <p>Add: Read-only Update: Read-only</p>	string
